**SANKHYĀ : THE INDIAN JOURNAL OF STATISTICS**  
**Contents of Volume Seventy Nine, 2017, Series A**

	Page
Asymptotic Properties of Hazard Rate Estimator in Censored Linear Regression <i>Fuxia Cheng.</i> ...	1
Estimation of the Parameters of a Selected Multivariate Population <i>Morteza Amini and Nader Nematollahi.</i> ...	13
Asymptotic Expansion of the Posterior Based on Pairwise Likelihood <i>Yang Wu and Malay Ghosh.</i> ...	39
Extended Generalized Skew-Elliptical Distributions and their Moments <i>Zinoviij Landsman, Udi Makov, and Tomer Shushi.</i> ...	76
Characterizing D-optimal Rotatable Designs with Finite Reflection Groups <i>Masanori Sawa and Masatake Hirao.</i> ...	101
A General Approach for Obtaining Wrapped Circular Distributions via Mixtures <i>S. Rao Jammalamadaka and Tomasz J. Kozubowski.</i> ...	133
On Concentration for (Regularized) Empirical Risk Minimization <i>Sara van de Geer and Martin J. Wainwright.</i> ...	159
Discussion of “concentration for (regularized) empirical risk minimization” by Sara van de Geer and Martin Wainwright <i>Stéphane Boucheron.</i> ...	201
Discussion of the Paper on Concentration for (Regularized) Empirical Risk Minimization by Sara van de Geer and Martin Wainwright <i>Sourav Chatterjee.</i> ...	208
Rejoinder <i>Sara van de Geer and Martin J. Wainwright</i> ...	212
On Univariate Convex Regression <i>Promit Ghosal and Bodhisattva Sen.</i> ...	215
New Asymptotic Results in Principal Component Analysis <i>Vladimir Koltchinskii and Karim Lounici.</i> ...	254
Estimator Selection: a New Method with Applications to Kernel Density Estimation <i>Claire Lacour, Pascal Massart and Vincent Rivoirard.</i> ...	298

	Page
Posterior Contraction Rates of Density Derivative Estimation <i>Weining Shen and Subhashis Ghosal.</i>	... 336
The Bennett-Orlicz Norm <i>Jon A. Wellner.</i>	... 355

## SUBSCRIPTION INFORMATION

Sankhyā publishes high quality research articles and is currently published in two series. Series A covers broad areas of Mathematical Statistics and Probability, while Series B covers a wide range of areas catering to Applied Statistics. Sankhyā comes out in four issues a year, two in each series. The two issues of Series A come out in February and August, while the two issues of Series B come out in May and November.

### Subscription within India

Subscription price within India is Rs. 400 per volume. Volumes less than five years old are charged at the current price. Single issue price is prorated. For subscription within India, please make bank draft or cheque payable to **Indian Statistical Institute** and mail it to the **Senior Administrative Officer, Publication and Printing Unit, Indian Statistical Institute, 203, B.T. Road, Kolkata - 700108, India**. Payments by credit/debit cards are not accepted. All enquiries related to subscriptions should be directed to the above address. Enquiries may also be sent by fax to *+91-33-2577-6035* (*Attention Sankhyā*) or by email to *ppu@isical.ac.in*.

Major authorized agents of Sankhyā for distribution within India are:

- |   |   |
|---|---|
| 1. Book Well<br>2/72, Nirankari Colony<br>New Delhi - 110009  | 2. Central News Agency Ltd.<br>4E/15 Jhandewalan Extn<br>New Delhi - 110055 |
| 3. International Book House<br>Pvt. Ltd.<br>Indian Mercantile-Mansions (Extn.)<br>Madame Cama Road<br>Mumbai - 400001 | 4. Saraswati Pustakalaya,<br>138/I, G.L.T. Road<br>Kolkata - 700035         |

### Subscription outside India

International (outside of India) Publication of Sankhyā is done by Springer. Springer has exclusive rights to distribute the Springer Link Electronic edition as well as the international (outside of India) print editions. All queries related to individual/institutional subscriptions outside of India should be addressed to:

- a) **journals-ny@springer.com** (for the Caribbeans and North, South, Central America).
- b) **subscriptions@springer.com** (for outside of the America).

Subscription-related information for outside of India may also be obtained from Springer by calling *+91-11-4575-5817*.

## INSTRUCTIONS FOR AUTHORS

Sankhyā, the Indian Journal of Statistics and an official publication of the Indian Statistical Institute, aims to publish original, high quality research articles in all areas of Statistics. Authoritative reviews and comprehensive discussion articles in areas of important and significant current research are also welcome. Sankhyā is published in two series. Series A covers Mathematical Statistics and Probability, while Series B caters to Applied and Interdisciplinary Statistics. Series A issues are published in February and August, while Series B issues are published in May and November.

Each submission to Sankhyā undergoes an independent peer review process. Each is initially reviewed by the handling editor-in-chief/editors and, if found suitable at this stage, it is then sent to external experts for review. It is understood that submissions made to Sankhyā are not being considered and/or are not accepted for publication elsewhere. All Sankhyā articles are abstracted/reviewed in *Mathematical Reviews* and *Zentralblatt für Mathematik*. We do not supply reprints of published articles. Author(s) of a published article receive one copy of the *particular* issue.

Both series of Sankhyā now have fully web-based online manuscript submission and tracking systems. For submissions to the journal, the authors should go to the respective websites for the two series. The websites for making online submissions to the two series are:

FOR SERIES A	<a href="http://www.editorialmanager.com/sank">http://www.editorialmanager.com/sank</a>
FOR SERIES B	<a href="http://www.editorialmanager.com/sanb">http://www.editorialmanager.com/sanb</a>

The acceptable formats for submission of articles are listed in the websites. After submission, the authors can also track the status of their submissions by logging in to the respective website using their assigned password.

Manuscripts to be submitted should be prepared, as far as possible, according to the general style followed in Sankhyā. Authors are advised to consult the latest issue for the Sankhyā style. Primary and secondary AMS subject classification numbers and some keywords and phrases should be mentioned at the bottom of the first page. A manuscript should mention institutional affiliation for each author after each author's name. A short running title should be given. A self-contained summary not exceeding 120 words is also required. Formulae should be numbered consecutively with numbers in brackets ( ) appearing in the right margin. Tables should have short explanatory headings and be numbered as Table 1, Table 8, etc. References appearing in the text should be as Roy (1956), Morgan *et al.* (1972) etc. References at the end should be listed alphabetically. Institutional address of each author with e-mail should be given at the end.

Our address is *Sankhyā, Indian Statistical Institute, 203 B.T. Road, Kolkata 700 108, India.* Fax: +91 33 2577 6035, +91 33 2577 3071.
